

Research Program Update

Upper Gastrointestinal
Cancer Registry (UGICR)

JANUARY 2021

Research Programs

The Upper Gastrointestinal Cancer Registry (UGICR), established in 2015 for people affected by all upper GI cancer types - pancreatic, oesophageal, gastric, biliary and primary liver cancer.

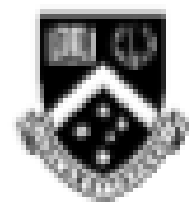

Led by world-renowned leader in gastrointestinal cancers, Prof John Zalcborg OAM, the UGICR is a multi-state, multi-centre Clinical Quality Registry (CQR) that uses real-world data to provide benchmarked quality of care reports and evidence-based best practice for cancer care. Pancare is a proud long-term supporter of the UGICR.

The Program is unique within Australia:

- Multi-modular - includes all five upper GI cancers
- Broad, multidisciplinary governance structure
- Framework for related research project

Research Programs

MONASH
University

PARTICIPATING HOSPITALS

- 47 in VIC
- 8 in NSW
- 1 in ACT

Lead Institution:	Monash University
Chief Investigator:	Prof John Zalcborg
Established:	2015 to current
Cancer type:	Pancreatic, oesophageal stomach, biliary, primary liver
Funding:	Pancare Foundation; others
Title:	Upper Gastrointestinal Cancer Registry

Research Programs

Research Objectives:

- Assess existing standard of care and practice
- Benchmark best practice multidisciplinary cancer care
- Provide a framework for continuing research and clinical trials

Research Outcomes to January 2021:

- > 4732 Australians participating in the UGICR
- Numerous peer-reviewed publications in high-impact journals
- Expanding nationally, increasing number of sites

Research Outcomes

PANCREATIC MODULE

- 2832 participants
- VIC, NSW focus
- 26 quality indicators
- 2 new related projects

OESOPHAGOGASTRIC MODULE

- 1601 participants
- VIC focus
- 16 quality indicators

BILIARY MODULE

- 299 participants
- VIC focus
- 19 quality indicators
- Pilot phase 2020
